Mid/Senior Full-Stack Engineer (React , Node.js & TypeScript)

We are looking for a trustworthy, curious, sharp, and proactive full-time Mid/Senior Full-Stack Engineer (React , Node.js & TypeScript) to join our team. You'll have the opportunity to design and develop innovative solutions to solve challenging problems related to Finance and/or Web3.

What You'll Do:

- Design and build advanced frontend applications using React and/or React Native
- Design, develop and maintain performant databases, libraries and APIs
- Work on bug fixing and improving application performance
- Continuously discover, evaluate, and implement new technologies to improve the application
- Unit-test code for robustness, including edge cases, usability, and general reliability.
- Collaborate with cross-functional teams to define, design, and ship new features.

Basic Qualifications:

- Bachelor's degree in computer science, engineering, or a related field
- 2+ years of experience in full stack development with React / React Native and NodeJS
- Extensive knowledge of front-end tech like React, HTML and CSS
- Great understanding of React Component Lifecycle and Hooks
- Proficient in TypeScript and ES6
- Have passion for UX/UI
- In-depth knowledge of Node.js frameworks such as Express.js and Koa.js
- Proficient in data structures and algorithms
- Familiarity with database technology — e.g. MySQL, PostgresSQL and MongoDB
- Have experience with performance, reliability, and stability optimization
- Ability to learn and adapt to new tools and technologies
- Ability to lead and complete projects independently, as well as work in a team
- Critical thinker and problem-solving skills
- Unwavering curiosity

Nice-to-haves:

- Experience with TailwindCSS
- Experience with client-side / local storage and mobile databases
- Experience with GraphQL and Graph Databases
- Experience with React-Spring or other animation libraries
- Have published an app to Apple App Store or Google Play store
- Interested in or have experience with web3 / decentralized technologies (e.g., IPFS, LIBP2P, blockchain, DAG, etc.)
- Willing to learn Rust for backend
